

AUDIO CONNECT

A SUITE OF ADVANCED CLOUD-BASED AUDIO SOLUTIONS

High-quality and reliable audio communication between the station and the field plays a key role in professional live productions. LiveU's Audio Connect solutions enable news anchors and producers in the station to communicate easily with camera operators and talents wherever they are.

LIVEU OFFERS TWO TYPES OF AUDIO COMMUNICATION SOLUTIONS:

▶ **LiveU IFB:**

One-way return voice communication from the station to the field

▶ **LiveU Audio Connect:**

Built on a cloud-based infrastructure, facilitating diverse and simple two-way or many-to-many (Audio Rooms) communication between the station and the teams on-site.

LiveU Audio Connect supports low delay and resilient audio communication. The solution leverages a smart algorithm that guarantees highest audio resiliency in every session regardless of network fluctuations.

An essential addition to your production toolbox, **Live Audio Connect** is easy to implement with a quick one-time set-up. Simply route your audio signals in the station to one of your existing LiveU servers using an audio interface unit (the same unit used today for LiveU IFB). You can also create an Audio Room from LiveU Central and start communicating with any of your field teams.

Audio communication can be made with any HEVC product line field unit regardless of their transmission destination: physical server, cloud server or the LiveU Matrix IP content management and distribution platform. When used with the LU800, Audio Connect supports two separate audio channels, which can be used by the camera operator and the talent.

The **LiveU Audio Connect** can be managed flexibly from the LiveU Central unified management platform.

Audio Connect from anywhere

Join an Audio Room from anywhere. Your entire team can now join an Audio Room from their field units, Control+ App, servers or directly via LiveU Central in their web browser.

LiveU IFB & Audio Connect include the following solutions:

	COMMUNICATION TYPE	DESCRIPTION	PRICING & OFFERING
LIVEU IFB	One way	Return audio communication from the station to the field	Included free of charge in all LiveU units
