

PRODUCE BROADCAST-GRADE, CREATIVE SHOWS FROM YOUR BROWSER

Next-Generation Cloud Video Production solution

LiveU Studio is the world's first cloud-native live video production solution with native LRT™ (LiveU Reliable Transport) input and output. LiveU Studio allows storytellers to seamlessly **produce high-quality, multi-cam events** with advanced features like video switching, remote callers, audio mixing, graphics, instant replay, and social media monetization before distributing them **to up to 30 digital and linear destinations** directly from their web browser.

ALL-IN-ONE STUDIO WORKFLOW

Input multiple sources coming from the LiveU EcoSystem and external solutions, including graphics.

CKLAIL

Switch up to 12 inputs with intuitive vision mixing, remote guest contribution, graphics, audio mixing, and produce your event – all from your browser

DISTRIBUTE

Broadcast your live content everywhere and reach your audience on up to 30 digital and linear channels at once.

MAKING LIVE PRODUCTION EASY & SCALABLE

LiveU Studio features an intuitive, user-friendly interface, that allows a single operator to run the entire production in broadcast-quality. This makes the learning curve a breeze, so you're ready to go in no time.

The scalability of LiveU Studio's control rooms enables producers to easily tailor their set-up to the unique demands of each project. This makes it highly cost-effective, as you only pay for the resources you need, ensuring top-tier production without breaking the bank!

ADVANCED FEATURE SET

VIDEO SWITCHING

- Live switching of up to 12 sources
- Configurable hotkeys
- Multiple key layer support
- Media bin
- Configurable fallback sources

MULTI-DESTINATION

- Up to 30 destinations publisher
- HLS streaming to third-party **CDNs**
- LRT™ output to LiveU channels, including LiveU Matrix

GRAPHICS & AUDIO

- Graphics builder
- Automatic lower thirds
- Third-party live graphics support
- Audio mixer

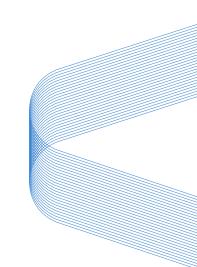

- Ultra-low latency guest contribution using WebRTC
- Seamless 'click a link to join' experience
- Screen share functionality
- 'On-air' status notification

PROFESSIONAL WORKFLOWS

- Frame accurate video switching
- Instant replay
- ISO recording
- Ad insertion
- Multiviewer
- Real-time performance monitoring

WHAT CAN I DO USING LIVEU STUDIO?

DISTRIBUTING LIVE VIDEO

Simultaneous live streams	Up to 30 destinations	
Supported live video protocols	RTMP, RTMPS, SRT, WebRTC, HLS, ZIXI, MPEG-TS, LRT $^{\text{TM}}$	
Supported live video resolution	Up to 1920x1080	
Supported live video bitrate	Up to 40Mbps	
Supported framerate	Up to 60fps	
Scan type	Interlaced, progressive	
Supported video codecs	H.264	
Supported audio codecs	AAC	
Supported audio bitrate	Up to 384kbps	
Video preset	Slow to Ultrafast	
Video profile	Main or Baseline	
Supported audio channels	Stereo	
Supported aspect ratios	Horizontal (16:9), Square 1:1, Vertical 4:5, Portrait 2:3, Stories 9:16	
SCTE-35 ad marker insertion	Available for HLS	

VIDEO-ON-DEMAND (VOD) FILE FORMAT SUPPORT

Supported video formats	MPEG-4 (.mp4), MKV or WebM
Supported video bitrate	Up to 40Mbps
Supported video codecs	H.264, H.265
Supported audio codecs	MP3, AAC
Supported file size	5GB per local file or unlimited via URL
Supported resolution	Up to 1920x1080
Multi audio, video or subtitle tracks	Supported

CLIPS EXPORT FORMAT SUPPORT

Supported resolution	Up to 1080p
Supported aspect ratios	Horizontal (16:9)
Supported video codecs	H.264
Supported video formats	MP4

GRAPHIC OVERLAYS AND IMAGERY

Graphic type	File	Live graphics: Dizplai, Singular, Flowics, StreamElements, Streamlabs
Supported resolution	Up to 1920x1080	Up to 1920x1080
Supported file formats	PNG, JPG, GIF, AVIF, WEBP, APNG	HTML5
Supported audio codecs	AAC	AAC
