### **LiveU Signs Definitive Agreement to Acquire Actus Digital Business and Technology, Enhancing AI-Powered Visual Intelligence for Mission-Critical Operations**

**Hackensack, NJ, April 28<sup>th</sup>, 2025** – LiveU, a global leader in real-time IP-video based visual intelligence solutions, has signed a definitive agreement to acquire Actus Digital's business and technology, significantly strengthening its video recording and monitoring, content analysis and Artificial Intelligence (AI) integration capabilities for government, intelligence, public safety, and law enforcement agencies.

Actus Digital's intelligent monitoring platform, trusted by government, regulatory, federal agencies, public safety, and security organizations worldwide, brings powerful AI enhanced content analysis and monitoring tools that complement the LiveU Visual Intelligence EcoSystem, increasing ease-of-use, performance, decision making and operational efficiency.

"We are delighted to be welcoming Actus Digital to LiveU," said Samuel Wasserman, CEO and Co-founder of LiveU. "Their exceptional ability to integrate powerful AI engines into their workflows, delivering advanced recording, content analysis, clipping, and monitoring capabilities across both audio and video feeds, such as transcription, translation, key points, facial recognition and content detection plus real-time alerts of specific topics or visuals, are perfect extensions to LiveU's reliable, low latency, high-quality, video-over-bonded-IP solutions."

Sima Levy, President and Founder of Actus Digital, added, "Joining LiveU will create a force-multiplier effect for our clients. The Actus Digital Intelligent Monitoring Platform has long set the standards for facilitating intelligence led decision-making and advanced content monitoring. LiveU brings easy-to-use options, making it simple to monitor more feeds, improving the quality of actionable visual intelligence and ultimately helping our customers make better informed decisions."

This latest strategic acquisition by LiveU adds advanced AI tools and a peerless intelligent monitoring platform to the LiveU EcoSystem, enhancing customers' mission-critical visual intelligence, monitoring and decision-making capabilities.

ENDS

### **About LiveU**

LiveU is a leading developer of real-time video transmission and streaming solutions, providing reliable connectivity for unmanned aerial and ground vehicles (UAV/Drone, UGV). With over 5,000 customers in 150 countries, our technology is trusted by a wide variety of private and governmental organizations, public safety agencies and other institutions worldwide. The ability to view real-time drone video resiliently, in high quality and with low latency, on any mobile/portable internet-connected device is a value that LiveU adds to situational awareness. Our state-of-the-art high-reliability video solutions are based around our pioneering LRT™ (LiveU Reliable Transport) protocol and use unique IP bonding technology to enable real-time and secure transmission from anywhere to anywhere over the public internet. LiveU is an Anglo-American company, headquartered in Hackensack, New Jersey, USA.
