

# LiveU for House of Worship - Expanding Your Ministry Reach with Live Video

One Church. One Message. Everywhere.

Your congregation doesn't stop at the church doors. Members travel, missionaries serve abroad, families watch from home and yet they all want to stay connected to worship and their community. LiveU helps ministries share their message live, reliably, and beautifully from anywhere to everywhere.

## What You Can Do Using LiveU

### Reach Your Global Community

Share services, sermons, and special events with members at home, traveling, or serving abroad.

### Connect Ministries in Real Time

Bring missionary updates, partner churches, and global outreach directly into weekend services.

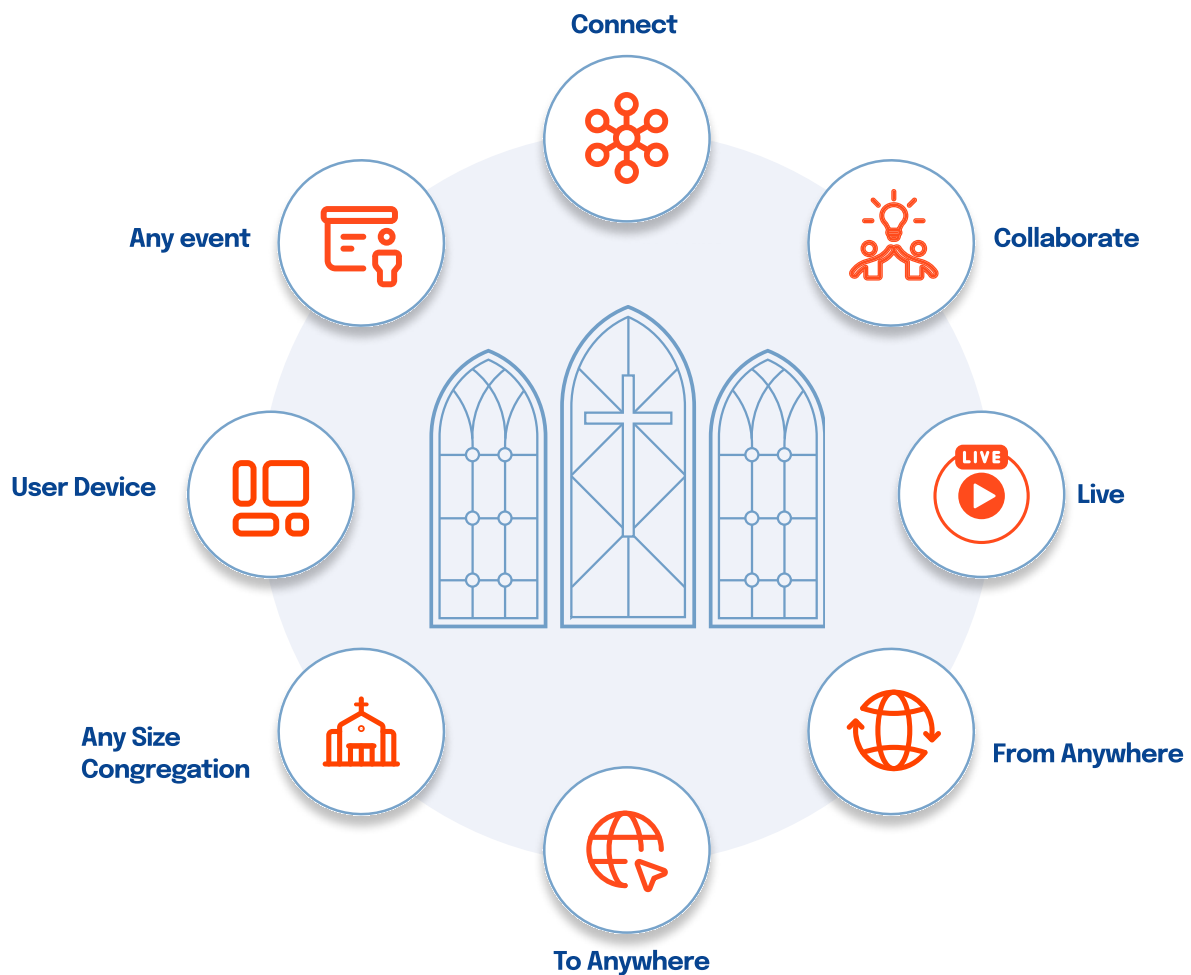

### Unite Multi-Campus Churches

Deliver one unified worship experience across multiple locations.

### Broadcast with Confidence

Stable, high-quality video even when networks are unreliable.

LiveU supports ministries of every size, from small churches beginning their streaming journey to growing congregations, multi-campus ministries, and global missionary organizations.

Whether sharing weekly services, bringing live updates from missionaries into worship, broadcasting special events, or connecting multiple locations into one unified experience, LiveU helps churches reach their community anywhere in the world with reliable, high-quality live video.

## Use Case Example:

Church Headquarter wants to produce a live video sermon, blending footage from four different cameras: one capturing the pastor, another the choir, a third showing the congregation, and a fourth broadcasting live from a missionary worker in Africa. The video editor receives these feeds, mixes them using a video mixer, and transmits the unified program to other churches.

This allows congregations in all locations to share a seamless and immersive live video experience, feeling connected as they watch the sermon, the choir, and the live missionary update together.

**Let's expand your ministry together.**
